Human Longevity, Inc. (HLI) is a genomics and cell therapy company focused on extending the healthy, high performance human lifespan. Led by a world-class team of scientific and medical visionaries, HLI's mission is to identify the therapeutically targetable mechanisms responsible for age-related human biological decline and to apply this intelligence to develop innovative solutions to interrupt or block those processes, meaningfully extending the human lifespan.

We are building a database of genotype and phenotype information together with data mining infrastructure, on a scale that has not ever been done before. We are trying to tackle some of the most vexing diseases like cancer, heart disease and diabetes. We are blazing a new trail in science, medicine and research and we need people who, like us, want to change the world. Our founders, along with our scientific and medical teams are impatient for the healthcare of the future. That is why we are working to change the way medicine is practiced through our genomic-focused, preventive model.

We are seeking world-class people who share our passion and want to play an integral role in executing the company's vision. If you are dynamic, innovative, creative, intelligent, and resourceful, consider joining our quest to improve the state of healthcare in the world today.

Bioinformatics Scientist (HLI0214)	La Jolla, CA, US	Full Time
Bioinformatics Scientist (HLI0614)	La Jolla, CA, US	Full Time
Bioinformatics Scientist (HLI0514)	La Jolla, CA, US	Full Time
Bioinformatics Scientist (HLI0414)	La Jolla, CA, US	Full Time
Bioinformatics Scientist (HLI0314)	La Jolla, CA, US	Full Time
Software Engineer - Genomics/Cloud and Database (HLI5714)	La Jolla, CA, US	Full Time
Software Engineer - Genomics / Cloud and Database (HLI0814)	La Jolla, CA, US	Full Time
Software Engineer - Genomics/Cloud and Database (HLI5614)	La Jolla, CA, US	Full Time
Software Engineer - Machine Learning/Big Data for Genomics (HLI4014)	Mountain View , CA, US	Full Time
Software Engineers - Machine Learning/Big Data for Genomics (HLI3314)	Mountain View , CA, US	Full Time
Bioinformatics Scientists (HLI2814)	Singapore, Singapore	Full Time
Software Engineers - Machine Learning/Big Data for Genomics (HLI3114)	Singapore, Singapore	Full Time
Software Engineer - Genomics / Cloud and Database (HLI3214)	Singapore, Singapore	Full Time
Systems Administrator - HLI3014	Singapore, Singapore	Full Time

http://metagenomics.anl.gov/

- 2008年にオープン
- 専門家以外は解析困難なメタゲノムデータの解析パイプラインを提供→利用者が激増
- Privateer（NIH&DOEファンド）であるもののpublic resourceとしてデータを収集
- INSDCのDBに登録されていないデータを多数収録
- 独自のIDを発行し論文に掲載可能
