

The Next Generation Medical Infrastructure Act passes all medical data to the future

Anonymized or Pseudonymized medical data assists with the development of new drugs and treatments.

Medical data will only be disclosed to parties authorized by the government to ensure safe management and proper usage. (Data provision can be suspended at the request of the patient.)

Providing us with your valuable medical data would be greatly appreciated, as it would aid in the development of next-generation medical practices.

For questions regarding the Next Generation Medical Infrastructure Act, such as an overview of the system and the provision of medical data to authorized parties by medical institutions.
