

Setting of Targets and Concepts

Visionary Council

Estimate the future society, and identify social issues which are common to Japan and overseas countries
(e.g. breaking away from the carbon energy society)

(Backcast)

Set targets for priority investment
(e.g. 80% reduction of CO2 emissions by 2050)

(Backcast)

Propose promising ideas for studies
(prospective ideas for projects)
(e.g. the space solar power system, etc.)

Ideas submitted by the general public

Experts inside and outside Japan (supporters)

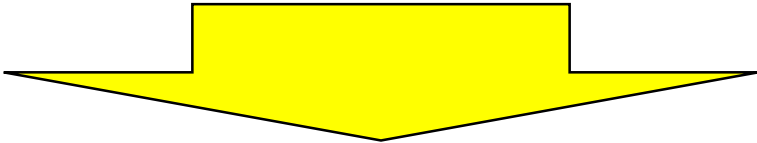

Backup

Domestic think tank
(CRDS, TSC, etc.)

Academia

Relevant ministries and agencies

Relevant ministries and agencies promote studies in close cooperation with each other

Mission: Strategically promote research and development including prospective ideas for projects, to achieve national targets

JST and NEDO are in charge of adoption and management of research and development programs
