総務省のSIPのテーマは、3つ

## Theme 1

- Vehicle-to-Infrastructure (V2I) [700 MHz]  
Information around an intersection is transmitted from a road side equipment (RSE) to vehicles

## Theme 2

- Vehicle-to-Pedestrian (V2P) [700 MHz / cell-phone]  
Information of a pedestrian and a vehicle are transmitted between pedestrians and vehicles

## Theme 1

- Vehicle-to-Vehicle (V2V) [700 MHz]  
Information such as speed and position of a vehicle is transmitted to other vehicles

## Theme 3

- Infrastructure Radar System [79 GHz]  
Small objects such as pedestrians and bicycles around an intersection are detected and collected by infrastructure radar
