

Working Group 1

Expanding human potential toward a society in which everyone can pursue their dreams

Chair: Dr. Miwako Doi, Sub-Chair: Dr. Hiroaki Kitano

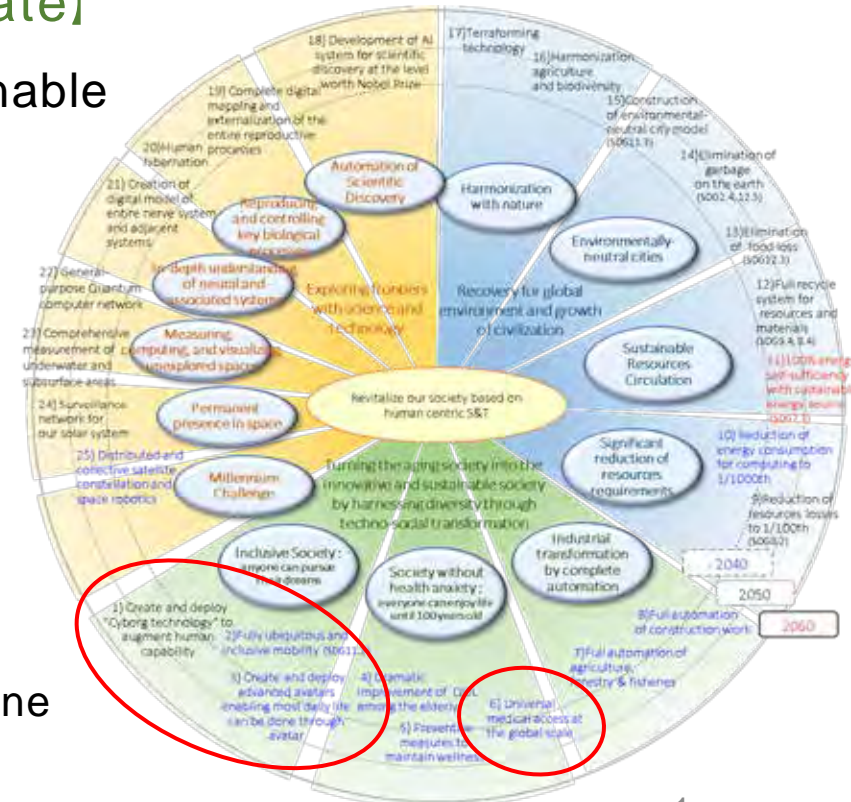

[The Moonshot [Area],[Vision] for setting MS [Goal] candidate]

- [Area]
- Turning the aging society into the innovative and sustainable society by harnessing diversity through techno-social transformation.

- [Vision]
- Inclusive Society: anyone can pursue their dreams.
 - Society without health anxiety: everyone can enjoy life until 100 years old.

[Examples of MS Goal candidate to be used as reference]

- 1) Create and deploy "Cyborg technology" to augment human capability
- 2) Fully ubiquitous and inclusive mobility
- 3) Create and deploy advanced avatars enabling most daily life can be done through avatar
- 6) Universal medical access at the global scale

Working Group 1

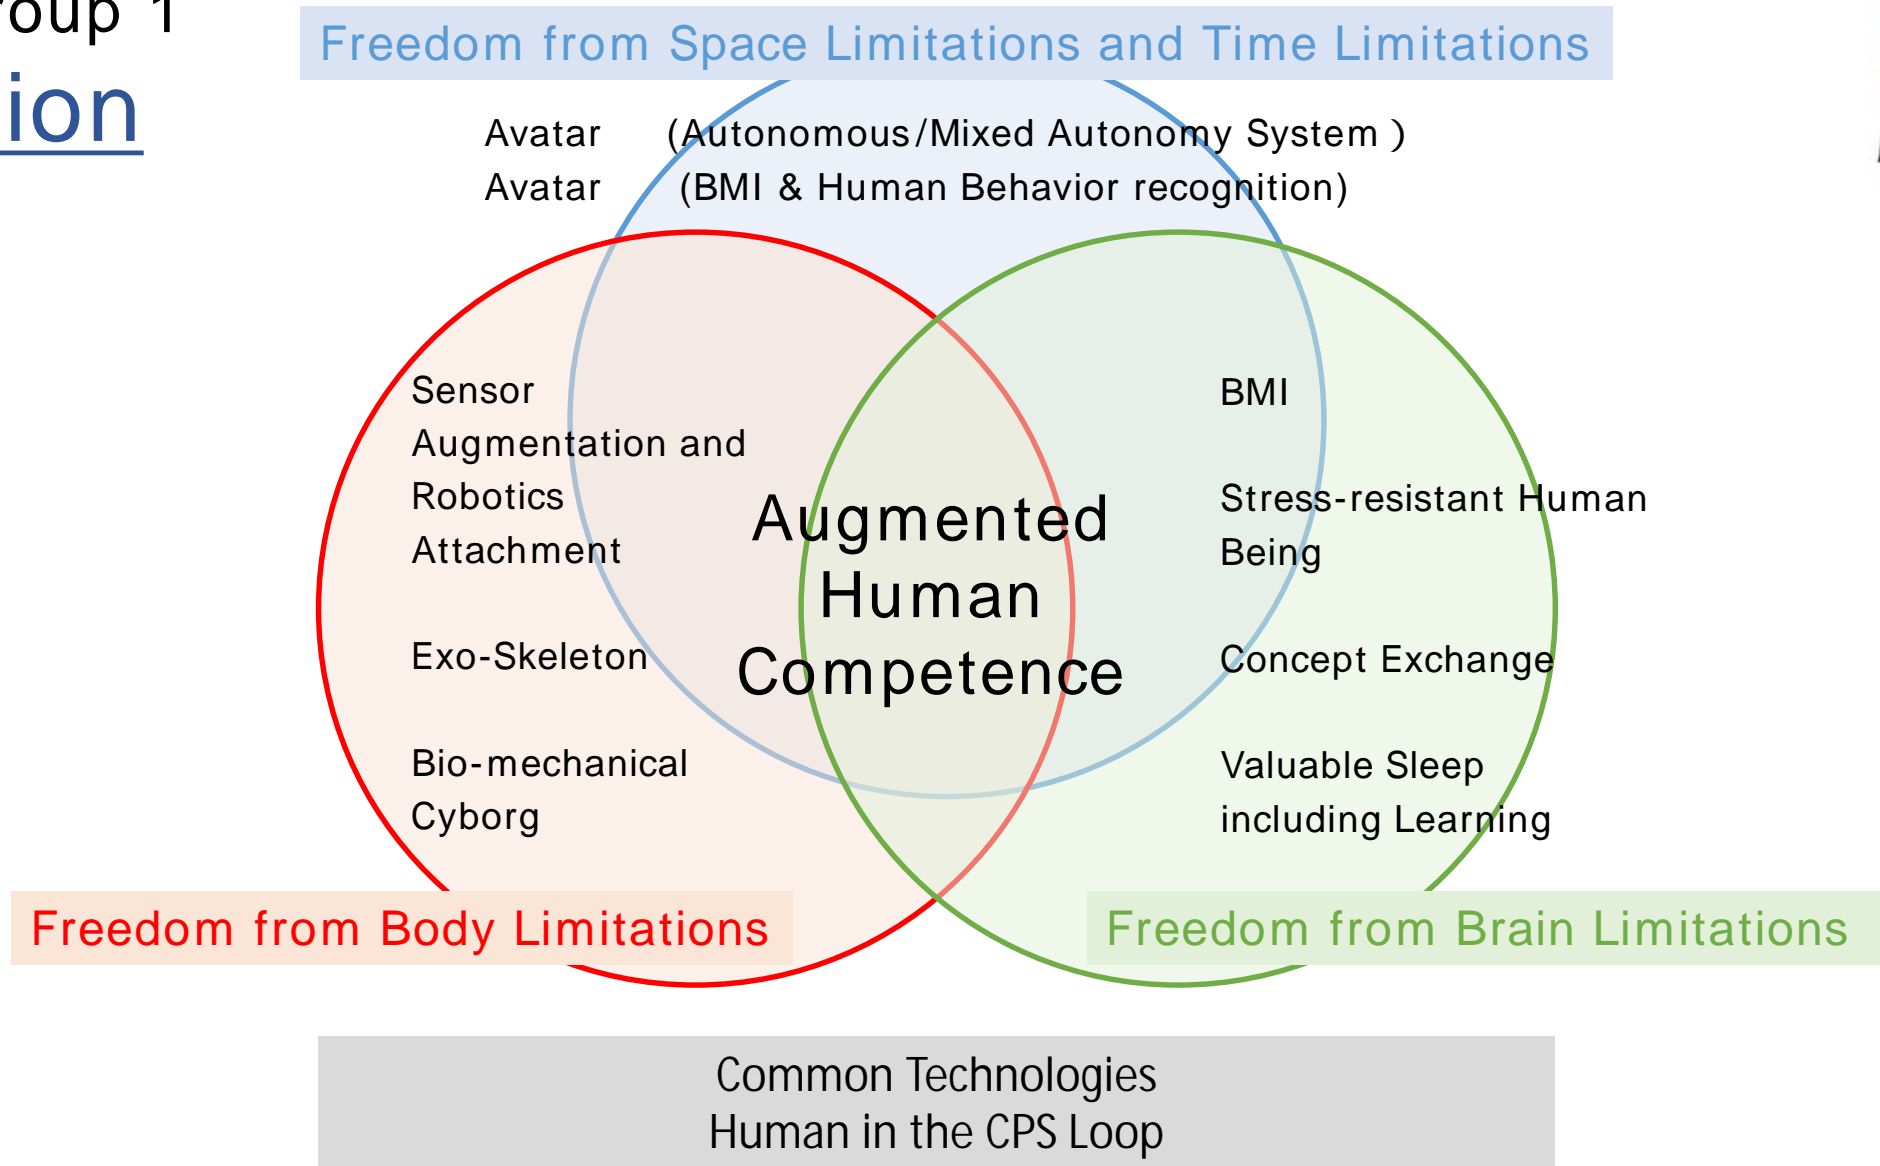

Discussion

【MS Goal candidate】

- By 2050, realization of a society in which human beings can be free from their limitations of body, brain, space, and time with harmonious empowerment.

s global perspective

Q1) "Expanding of the brain abilities" means

BRAIN FUNCTIONS/ABILITIES

- Decision
- Creation
- Motion
- Emotion
- Speech
- Cognition
- Perception
- Memory
- ...

New Brain Functions?

C-Avatar Capitalism
for Diversity and Inclusion

C-Avatar Life

If only one teleoperator could control many C-Avatars,
May human brain acquire new functions?

Working Group 1 Discussion

Freedom from Space Limitations and Time Limitations
Dr. Kitano, Dr. Locke, Prof. Inami

AVATAR APPLICATIONS

Physical robotic avatars can be used across a range of possible real-world scenarios including...

- Avatars can connect humans to humans
- Avatars can connect humans to a specific need or skill
- Avatars can enable us to explore our world

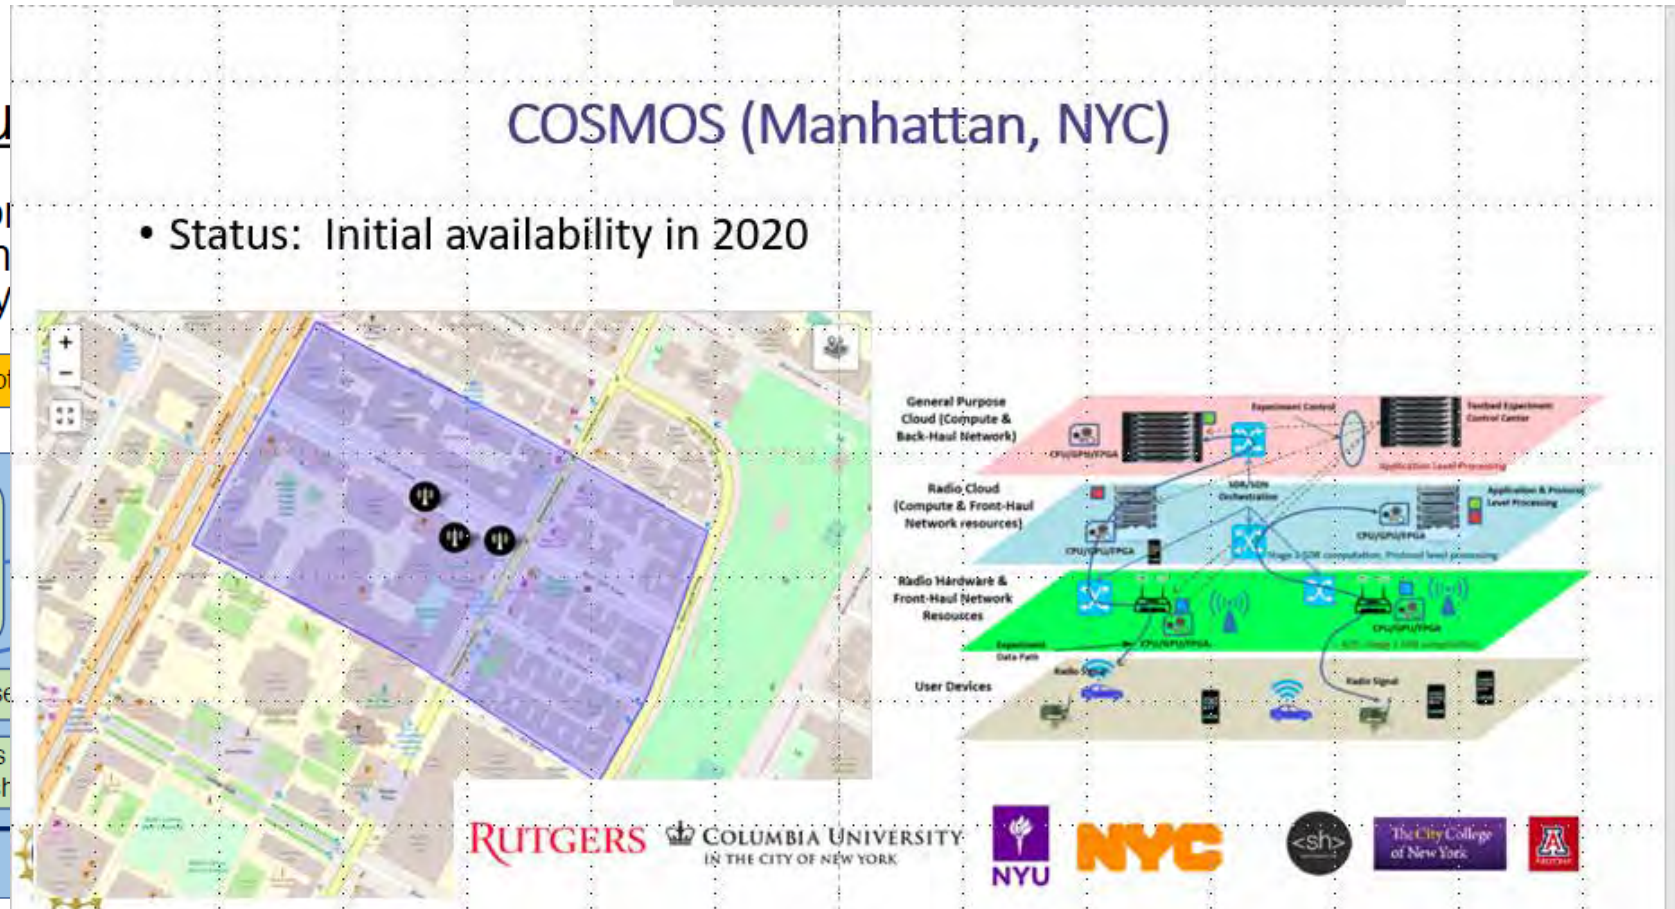

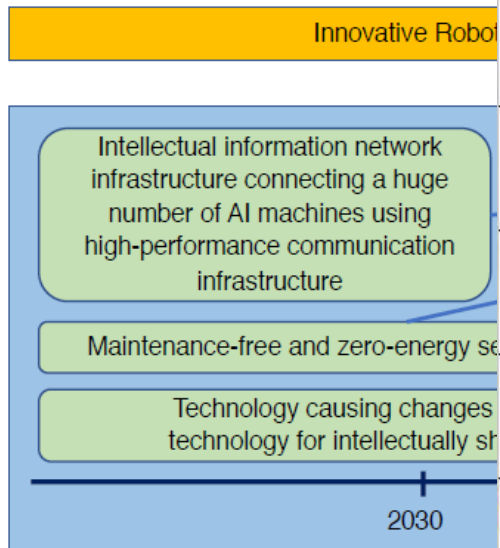

Working Group 1 Discussion

Common Technologies Human in the CPS Loop
Prof. Higashino, Dr. Calvert, Dr. Tokuda

Research Issues for Future

- What do we need for future cognitive science, robotics and avatar technology

Working Group 1

Conclusion

[MS Goal candidate]

- By 2050, realization of a society in which human beings can be free from their limitations of body, brain, space, and time with harmonious empowerment.

[Target]

Cybernetic Avatar Capitalism for Diversity and Inclusion

- By 2050, develop technologies and infrastructure to carry out large-scale complex tasks using combinations of large numbers of avatars and robots that are teleoperated by multiple persons.

Cybernetic Avatar Life

- By 2050, anyone willing shall be able to augment their physical, cognitive, and perceptual capabilities to the level of the best experts of selected domains.

Working Group 1 Conclusion
