

*1) mark and proof seal

A manufacturer shall attach a mark stipulated by the regulation of type approval and an approval seal that has following information to an equipment approved by type approval:

(1) Name of approved manufacture, (2) name of equipment, (3) type of the equipment, (4) approval number and date approved, (5) date manufactured, (6) other information necessary for approved manufacture.

*2) Labeling (Certification of Conformity with Technical Regulations)

A designated certification body shall attach the label stipulated by the Ministerial decree to the radio equipment certified its conformity with the technical regulations.

*3) Labeling (Certification of Conformity with Construction Design)

A dealer of certification may attach the label stipulated by the Ministerial decree to the specified radio equipment, given the implementation of obligation of conformity of construction design and obligation of investigation and record retention.

*4) Labeling (Self Declaration)

An applicant may attach the label stipulated by the Ministerial decree to the specific radio equipment, given the implementation of obligation of conformity of construction design and obligation of investigation and record retention.

*5) Labeling (Type Designation)

A designated manufacture/importer shall attach the label stipulated by the Ministerial decree to the designated type of equipment.

*6) Labeling (Type Confirmation)

In Type confirmation process, a manufacture/importer confirms the conformity and file to the Minister of Internal Affairs and Communications.
