MEMORANDUM FOR: JAPANESE GOVERNMENT

SUBJECT: Designation of Suggested Sources on Occupation Force Requirements

1. The attention of the Japanese Government is directed to the fact that the Special Procurement Board is the only agency authorized to select, or negotiate with, contractors for accomplishment of procurement for Occupation Force requirements (supplies and equipment, services, construction, and real estate). In the future, it is desired that the Special Procurement Board exercise its complete responsibility in this connection.

2. Accordingly, the Occupation Forces will no longer suggest, name or select sources, or conduct preliminary discussions with potential contractors without the prior knowledge of the Special Procurement Board, in connection with any future requirements. Exceptions are authorized in special instances such as where the item can be supplied from only one source, where spare parts or appliances are required for items for which the suggested source was the original supplier and in such cases where the contractor was originally performing functions in connection with an installation which is being taken over by the Occupation Forces. However, General Headquarters, Supreme Commander for the Allied Powers, will require that the organization and operation of the Special Procurement Board are such that contractors fulfilling Occupation Force requirements are designated as quickly as possible, consistent with the policy that all requirements will be effected at the lowest possible cost and that reasonable quality and delivery time will be obtained.

3. Lists of prospective contractors chosen by the Special Procurement Board will be submitted to Occupation Force receiving officers for prequalification.

a. Occupation Force receiving officers may disqualify any prospective contractor for the following reasons:

- (1) Removal for cause from previous Occupation Force requirements.
- (2) Unsatisfactory performance, either time or quality, on previous Occupation Force requirements.

- (3) Conviction of contractor, his employees or agents for graft.
- (4) Lack of past experience on work of same nature.
- (5) Lack of necessary supervisory and technical personnel.
- (6) Lack of a work force or source of skilled and unskilled labor.
- (7) Lack of sufficient quantity or quality of equipment and facilities.
- (8) Insufficient capital or means of financing the requirements.
- (9) Lack of technical knowledge.
- (10) Excessive amount of work already being done.

4. In preparing the list of prospective contractors, the Special Procurement Board will be guided by the same considerations stated in paragraph 3 above.

SUBJECT: Application for Permission to Activate or Inactivate Weather Stations

1. References are:

a. The following memoranda for the Japanese Government from General Headquarters, Supreme Commander for the Allied Powers:

- (1) AG 000.93(25 Sep 47)GB/P&E, SCAPIN 1782, 25 September 1947, subject: Japanese Weather Service.
- (2) AG 000.93(25 Sep 47)GB/P&E, SCAPIN 1782/1, 21 August 1948, subject: Japanese Weather Service.
- (3) AG 000.93(25 Sep 47)GB/P&E, SCAPIN 1782/2, 14 October 1948, subject: Japanese Weather Service.

b. Memorandum from the Japanese Government to General Headquarters, Supreme Commander for the Allied Powers, C.L.C.O. No. 3306 (2P), 21 September 1948, subject, same as above.

2. Reference 1a(3) lists the Japanese weather stations which are authorized to operate. In view of the fact that this list does not include the twenty-two (22) stations given in reference 1b, a request for inactivation of these twenty-two stations is unnecessary. Inactivation may, therefore, proceed without further authorization.

3. The activation of a seismological station at Matsushiro as requested in reference 1b is not approved at this time. No objection is raised to the resubmission of this application at a future date or the submission of future applications for activation of research stations for the Central Meteorological Observatory. However, it is assumed that in considering such applications, the Japanese Government will take advantage of the provisions of Public Law No. 121 of 1948, Science Council of Japan Law and Public Law No. 253 of 1948, Scientific and Technical Administration Commission Law.

PROCEDURES FOR IMPLEMENTATION OF  
PROGRAM FOR ENTRY OF INDIVIDUALS  
TO VISIT RELATIVES

1. a. Prospective visitors to Japan will make application to a commercial carrier or travel agency for entry into Japan to visit relatives giving the necessary information and making necessary guarantees as shown on the application form.

b. The commercial carrier will forward the application to the Japanese Government for consideration.

2. a. Upon receipt of the application, the Japanese Government will contact the prospective host to determine:

(1) That the host desires to have said relatives visit him.

(2) That the host has adequate accommodations available for his visitors.

b. When the Japanese Government has received assurances that the conditions outlined in par 2a above have been fulfilled, the Japanese Government will notify the Supreme Commander for the Allied Powers that it has no objection to entry into Japan of the visitor. Information will include the name, nationality, method of travel, port of entry, proposed dates of the visit, and the name, address and nationality of the host.

c. The Supreme Commander for the Allied Powers will notify the Japanese Government of final approval for entry Japan of the prospective guests, at which time the Japanese Government will notify the commercial carrier and the Commanding General, Eighth United States Army, that clearance for entry Japan has been granted. Notification to Commanding General, Eighth United States Army, will include details as outlined in par b above.

d. It will be the responsibility of the commercial carrier to notify the guest of the approval of his application to enter Japan.

3. Upon receipt of a notification of the approval of his application, the visitor may apply for his passport (and in the case of United States citizens, a military permit) and arrange for transportation by a commercial carrier to Japan. Appropriate authorities have been notified that the approval of the application constitutes approval from the Supreme Commander for the Allied Powers for the issuance of a passport and a military permit for entry into Japan in the case of American citizens and is considered sufficient clearance for the entry into Japan of other than American citizens.

4. Upon arrival at port of debarkation in Japan, the visitor will file proof of his arrangements for departure from Japan with the Japanese Government representative. Appropriate notation will be made in the visitor's passport to indicate his tourist status.

APPLICATION FOR ENTRY INTO JAPAN  
FOR THE PURPOSE OF VISITING RELATIVES

Procedures

5. The commercial carrier will then place the visitor in charge of a properly designated agent of the Japanese Government who will:

a. Insure that the visitor arranges to notify his diplomatic or consular representative in Japan of his arrival and his address in Japan. This may be done by letter or postal card.

b. Furnish transportation to a bank licensed by the Supreme Commander for the Allied Powers for operation in Japan, to affect any conversions or deposits of currency necessary. The only currency which subject visitors will be allowed to possess while in Japan is Japanese yen obtained at the military conversion rate. Those visitors authorized to purchase food at the Overseas Supply Store will temporarily possess foreign trade payment certificates in the amounts necessary to effect these purchases. (Fifty dollars (\$50.00) for each fifteen (15) day period or fraction thereof, of stay in Japan.)

c. Make necessary arrangements for the onward travel of the visitor to the home of the host. If layover is necessary prior to departure from the port of entry, the Japanese Government agency is responsible for locating necessary housing for any overnight stay involved.

d. Make arrangements for the purchase from the Overseas Supply Store of food supplies if visitor has not imported the necessary food.

6. Visitor will complete his visit and return to the port of embarkation in such time as to depart within sixty (60) days after his arrival in Japan. The visitor will not be permitted to convert yen into other currencies upon departure.

Section I.

Any individual line service terminated on the premises of the hotel and subscribed for by either the Board of Trade or its hotel management, or by commercial entrants will be for the exclusive use of the subscriber, and will be subscribed for directly with the Ministry of Communications by the subscriber.

4. The Board of Trade and its hotel management will provide an adequate force of English-speaking operators to cover the private branch exchange switchboard and the attended public paystations system to provide a uniform good grade of service. The Ministry of Communications will assist the hotel management in training the operators for the work to be done, and will send to the hotel, as occasion demands a private branch exchange service supervisor to observe the quality of service being rendered by the hotel's operator force and to advise with the chief of the hotel's operator force.

5. Each outgoing local call completed through the hotel's private branch exchange switchboard and/or the attended public paystation system for the hotel guests and the general public will be paid for in Japanese yen regardless of whether or not the person placing the call is a commercial entrant, a member of the occupation forces or anyone else. The charge per call will be four (4) yen.

6. Each long distance call completed through the hotel private branch exchange switchboard and/or the public paystation system for the hotel guests and the general public will be paid for in Japanese yen regardless of whether or not the person placing the call is a commercial entrant, a member of the occupation forces or anyone else. Cancellation charges for long distance calls placed but not completed due to no failure on the part of the Ministry of Communications will be paid for accordingly in yen.

7. The following classes of long distance telephone service will be available to anyone placing calls through the hotel's private branch exchange switchboard and/or public paystation system at the rates indicated:

Class

Rate Treatment

# a.	Ordinary	Ordinary rate
# b.	Urgent	Twice the ordinary rate
# c.	Special Urgent	Three times the ordinary rate
# d.	Time Appointment	Four times the ordinary rate
# e.	"AF Call"	Five times the ordinary rate

# (Ordinary, Urgent, Special Urgent and Time Appointment calls will be completed over the regular Japanese long distance facilities only, and will not be handled over the special facilities or by the special long distance operators used for handling "AF Call" message service).

The charges for long distance call cancellations will be applied at the regularly established yen rates.

8. No long distance calls originated through the hotel's switchboard, and/or public paystation systems, will be transmitted over the official long distance lines of the occupation forces.

9. The Ministry of Communications will bill monthly and collect from the hotel its regularly established rate of two (2) yen for each outgoing local call completed through the hotel's private branch exchange switchboard and/or public paystation system. Charges for completed long distance calls and for long distance call cancellations will be billed monthly and collected from the hotel with rate treatment applicable as set forth in paragraph 7 above, less a ten (10) percent credit which will be shown % on the bill as a commission to the hotel as compensation for assistance rendered in handling calls.

10. The Ministry of Communications and the Board of Trade will coordinate in issuing instructions to their respective employees which are appropriate and necessary to implement the provisions of all the above regulations.

a. Dismantling and packaging of restitution items at the impounding site will be accomplished by the packaging contractor in accordance with the provisions of reference 1b above and designated annexes of reference 1a above, and in coordination with the repair contractor, engaged through normal foreign trade channels, so that excess costs due to repair requirements, will be minimized. All costs of dismantling and packaging at such locations will be borne by the Japanese Government

b. This receipt will release the Japanese Government from further responsibility for the property as restitution items

c. Costs of transporting the property from its impounding site to repair location, and subsequently, from repair location to dockside and loading aboard ship will be paid initially by the Japanese contractor engaged by foreign trade contractor to execute repair of the restitution items. e. The contractor will be reimbursed in yen, by the appropriate agency of the Japanese Government, as separate items for the following:

- (1) The amount it would have cost to transport the equipment directly from impounding site to dockside and load aboard ship at the port designated by the Supreme Commander for the Allied Powers, in accordance with the provisions of memorandum referred to in paragraph 1b above
- (2) Any cost additional to that shown in e(1) for handling and transporting the equipment from the impounding site to the repair location and thereafter from the repair location to dockside and aboard ship, where the contractor's responsibility ceases

- (3) The contract price for the repair work done pursuant to the contract in accordance with the existing foreign trade payment procedures

f. The price to the claimant nation will be the contract price, in acceptable foreign exchange, of the items designated in subparagraph e(2) and e(3) above. Payment will be made as provided in paragraph 3 above.
