Other	7.3	4.9	8.8
Unknown	2.5	3.2	1.8
None	18.1	17.8	17.2

【 3 】 The Basic Program for Persons with Disabilities and the Five-year Plan for the Implementation of Priority Measures

1. The Basic Program for Persons with Disabilities

Article 11 of the Basic Act for Persons with Disabilities mandates the establishment of a basic program regarding policies for persons with disabilities.

The presently active Basic Program was established by Cabinet decision in December of 2002 with the duration of ten years from 2003 to 2012. While building on the concepts of former long-term plans such as "normalization" or "rehabilitation" and the concept of a "Cohesive Society"—one in which everyone respects and supports the personality and individuality of others—this plan establishes the basic direction of measures for persons with disabilities during the plan period. It aims for the realization of a society where persons with disabilities can take part and participate in all sorts of activities based on their own choices and free will, and where the rights of persons with disabilities are respected as those of equally constitutive members of society.
