**Part 1  Current Status of Countermeasures against Declining Birthrate**

**Chapter 1  Current Status of Declining Birthrate**

1. Trends and projections of Japan’s total population and demographic structure..........................3
   - The total population predicted to fall below 100 million by the year 2053......3
   - The ratio of young-age population is smaller in Japan compared to other countries............................................5

2. Trends in the Number of Live Births and Birthrate..........................................................6
   - The number of births falling below 1 million per year.................................6
   - Transition of total fertility rates in foreign countries........................................7
   - Rise of birthrate in women in their 30s........................................................11

3. Trends in Marriage and Childbirth........................................................................12
   - The number of marriages/marriage rate continuing to decline.......................12
   - Trend toward less marriage............................................................................14
   - Slowing progress of trend toward delayed marriage/childbirth......................15
   - Completed fertility at an all-time low of 1.94 ...............................................17

4. Intention of getting married....................................................................................18
   - The Attitude toward Marriage ........................................................................18
   - Difference in family formation according to the mode of employment..........20

5. Thoughts about childbirth and childrearing..........................................................24
   - Thoughts about childbirth.............................................................................24
   - Increase in the percentage of females who continued to Work after Child Birth (by ages of child birth, composition of employment status before and after the first birth)..........................................................26
   - Long working hours for men who have families with small children..............28
   - Men’s hours spent on housework/childcare...................................................29

6. Prefectural comparison............................................................................................31
   - Trend of the total fertility rate by prefecture..................................................31
   - The birthrate by mother’s age bracket per prefecture....................................32
   - The ratio of unmarried at the age of 50 by prefecture....................................33

**Chapter 2  Efforts to Deal with Declining Birthrate**

1. Past Efforts..........................................................................................................34

2. Human Resources Development Revolution [Special topic].................................39

   1. Introduction......................................................................................................39
2-1 Human Resources Development Revolution in anticipation of an era of 100-year life expectancy ................................................................. 39
2-2 “New Economic Policy Package” and conceptual meeting for an era of 100-year life expectancy .............................................................. 40
3-1 Free early childhood education ................................................................................................................................. 40
   Roles of early childhood education/childcare ................................................. 40
   Details............................................................................................................. 41
3-2 Elimination of childcare placement waiting lists .................................................... 43
   Current situation of wait-listed children......................................................... 43
   Comprehensive After-school Plan for Children ............................................. 43
3-3 Free higher education .................................................................................... 43
   Efforts in the past and the basic principle ...................................................... 43
   Details............................................................................................................. 43
   Requirements for eligible students ............................................................... 44
   Requirements for eligible universities, etc..................................................... 44
   Schedule of implementation ........................................................................ 44
   Learning support for children in needy households ..................................... 44
3-4 Substantive free education at private high schools................................................. 45
3-5 Stable financial resources to realize these measures ................................................... 45
4. Additional agendas in conceptual meetings in an era of 100-year life expectancy .......................................................................................... 46

Section 3 To Realize a Childrearing Friendly Society

[Special topic] ............................................................................................... 47
1. Introduction ..................................................................................................... 47
2-1 Efforts in Workplaces.................................................................................. 49
   Support various ways of working for employees by various systems............ 49
   Go to work with children! ........................................................................... 51
2-2 Efforts in the community............................................................................. 52
   From support being just wait to support to be delivered.............................. 52
2-3 Efforts Focusing on Going out and Moving................................................ 53
   Town-planning to be chosen by a childrearing generation......................... 53
   Family Friendly Train.................................................................................. 54
   Visualizing “kindness” ............................................................................... 55
3 Conclusion....................................................................................................... 56
Part 2 Implementation Status of Countermeasures against Declining Birthrate

Chapter 1 Key Challenges

Section 1 Further enhancement of child care support measures

1. Smooth implementation of the children and childrearing system
   Qualitative and quantitative improvement in child education, nursing and childrearing according to regional situations
   Improvement of various childcare supports according to regional needs
   Provision of a Variety of Childcare Services

2. Reduce Wait-listed Children
   Current situation of wait-listed children
   Plan to rear children with peace of mind and others
   Promotion of “human resources securing measures”

3. Breaking “the barrier of elementary-school first-grade children”
   Promotion of Comprehensive After-School Plan for Children
   Enhancement of After-school Children’s Clubs
   Promotion of the After-school Classes for Children

Section 2 Development of environment in which hope for marriage and childbirth can be realized

1. Stable economic basis
   (Stable employment of young people)
   Promotion of measures against non-regular employment
   (Promotion of economic support for young generation by older generation)
   System of gift tax exemption in relation to package donation as marriage and childrearing funds as well as education funds

2. Support for marriage
   (Government’s support for local governments and the Chamber of Commerce and Industry which provide marriage support)
   Development of momentum all around Japan
   Utilization of “Subsidy for Promotion of Countermeasures against Declining Birthrate in Local Areas”
   Utilization of “Subsidies for Supporting Marriage and New Lives”

Section 3 Promotion of Work Style Reform of Men and Women

1. Reforming men’s consciousness and behavior
   (Correction of long working hours)
   Restriction of long working hours and promotion of use of annual leave
   (Promotion of men taking childcare leave immediately after their spouse giving birth)
   Encouraging men to take Childcare Leave
2. Work-life balance and women’s advancement in the workplace ......................... 80
   (Improvement of environment toward work-life balance) ............................... 80
   Well-established work-childcare balance for childcare leave and short work
   hours ............................................................................................................... 80
   (Promotion of Female participation and advancement) ................................. 80
   Promotion of female participation and career advancement in the
   workplace ........................................................................................................ 80

Section 4 Strengthening of Initiatives Tailored to Actual Regional
Circumstances................................................................................................. 83

1. Support for regional measures by taking advantage of their strength ............... 83
   Supporting Local Government...................................................................... 83

Chapter 2 Promotion of Precise Measures against the Declining Birthrate ................................. 86

Section 1 Support for each different stage of marriage, pregnancy, childbirth and childrearing ......................................................... 86

1. Pregnancy and childbirth............................................................................. 86
   (Construction of seamless support systems from pregnancy to childrearing).... 86
   Improvement of “the comprehensive childrearing support centers”............. 86

2. Childrearing ................................................................................................. 87
   (Reduction of childrearing and educational burdens in expenditure)............ 87
   Child Allowance System.............................................................................. 87
   Incremental Efforts toward Free Access to Early Childhood Education...... 87
   Supporting the Learning of High School Students....................................... 88
   Measures for educational expenses reduction for higher education............. 88
   (Support for various people who help raise children and grandchildren)..... 90
   Support by grandmothers/grandfathers ...................................................... 90
   (Improvement of environment where children grow healthy and safe) ......... 91
   Promoting a Supply of Good Quality Rental Houses for Family Use........... 91
   (Enhancement of the Healthcare System for Children)............................... 91
   Enhancement of the Healthcare System for Children .................................. 91
   (Children’s sound growth)......................................................................... 92
   Development of an educational environment for preschool children......... 92
   Organization of environments where local communities work on child
   education as a whole ..................................................................................... 93
   (Improvement of communities’ safety).......................................................... 94
   Prevention of accident and its recurrence in kindergartens and nursery
   centers ......................................................................................................... 94
   (Support for single parent families)............................................................... 94
   Economic Support ........................................................................................ 95
(Prevention of child abuse and enhancement of social care).................................95
Prevention of child abuse and early detection before it becomes too late.....95
Quality improvement for facilities for social care........................................99
(Efforts to Support Children with Disabilities).................................................99
Realization of cohesive society .....................................................................99
Provision of support by strengthening collaboration with related
organizations........................................................................................................99

3. Child poverty................................................................................................106
Efforts supported by the society as a whole..................................................106
Policy Research ............................................................................................106
Measures against child poverty in Okinawa.................................................106

Section 2 Promotion of Measures against Declining Birthrate through
Actions by Society as a Whole ................................................................. 108

1. Creation of friendly society for marriage, pregnancy, children
   and childrearing..........................................................................................108
   (Improvement of facilities and environment for easy outing of pregnant
   women, mothers and children) ..................................................................108
   Promotion of Barrier-free Childrearing ......................................................108
   (Preferential service to persons with children) .........................................109
   Nationwide campaign of childrearing support passport ......................109

TOPICS
• Joint Conference on Low Fertility, Challenges and Responses in the Era of Aging
  Population ..................................................................................................10
• Nursery schools managed by companies and universities .....................64
• Special Task Force to Overcome Declining Birthrate .............................73
• Measures for declining birthrate depending on the areas ......................84
• Childrearing Support at the Area Affected by the Great East Japan Earthquake .......101
